

A Professional Scrum training course created by  
Ken Schwaber, Scrum.org, and the Professional Scrum Trainer Community

The Scrum.org mission is to improve the Profession of Software Development.

As part of our mission, Scrum.org provides the highest quality Scrum training, including the most advanced training materials and certified Professional Scrum Trainers (PSTs) to deliver it. The curriculum and courseware are highly-tuned and standardized.

Training materials are created and maintained by Scrum co-creator Ken Schwaber with the Scrum.org PST community, helping to ensure that they are always in tune with what's happening in software development organizations and always up-to-date with the latest practices.

Courses are provided around the world. Our PSTs can work with you to plan a private course to meet your organization's specific needs. For globally distributed organizations, our PSTs work together to provide training for your staff wherever they reside, ensuring that they are all learning the same thing. Consistent training is critical for large scale efforts where many teams are working together on the same products.

Our trainers bring their own style and experience to courses, but all trainers use the same materials around the world so that students are learning from the same content regardless of where the course is taught and who is teaching it.

## Course Objectives

Students are challenged to think in terms of Scrum and the Scrum principles to better understand what to do when they return to their workplaces, and their specific challenges.

Students will have a clear understanding of the mechanics of Scrum and how the Product Owner role fits in.

Students can act as a Product Owner for Scrum Teams and stakeholders.

Students can effectively increase the business agility of their organization.

## Course Description

Being a professional Product Owner encompasses more than writing requirements or managing a Product Backlog. Product Owners need to have a concrete understanding of all product management aspects, including but not limited to product ownership, that drives value from their products.

The 2-day Professional Scrum Product Owner course focuses on all of these areas to teach students how to maximize the value of software products and systems.

PSPO is the cutting-edge course for Product Owners, Agile product managers and anyone responsible for a software product's success in the market. In this course, students will develop and solidify their knowledge of being a Product Owner through instruction and team-based exercises. The breadth of the role's responsibilities in delivering a successful product will become more clear from an Agile perspective. Metrics are identified to track the creation of value and the successful delivery of the product to the marketplace.

The PSPO course is much more than just a set of slides and an instructor. In this course, students work on real-life cases with other classmates together as a team. This course is made up of discussions and hands-on exercises based upon real-life cases.

**IMPROVING THE PROFESSION  
OF SOFTWARE DELIVERY**

## Who Should Attend?

The PSPO course may be interesting to all involved in software development upon the Scrum framework, but has been specifically conceived for those responsible over products from a business and product management perspective and taking up the highly accountable role of Scrum Product Owner.

## Course Topics

- Agile Product Management
- Value-Driven Development
- Scrum Principles & Empiricism
- The Scrum Framework
- Product Backlog Management
- Release Management

## Assessment Certification

All participants completing the Professional Scrum Product Owner course receive a password to take the PSPO I assessment and are entitled to a discount on the PSPO II assessment. The industry-recognized PSPO certifications require a minimum passing score on these rigorous assessments.
